

HYSTA

PRESSKIT

MY HEART BELONGS
TO HARDCORE

BIOGRAPHY

FROM THE UNDERGROUND TO
THE WORLD'S BIGGEST STAGES

As she always says, **"My heart belongs to Hardcore."**

Recognized as one of the **most influential female artists in the electronic music scene**, Hysta has established herself as one of the **leading figures of the hard music generation**.

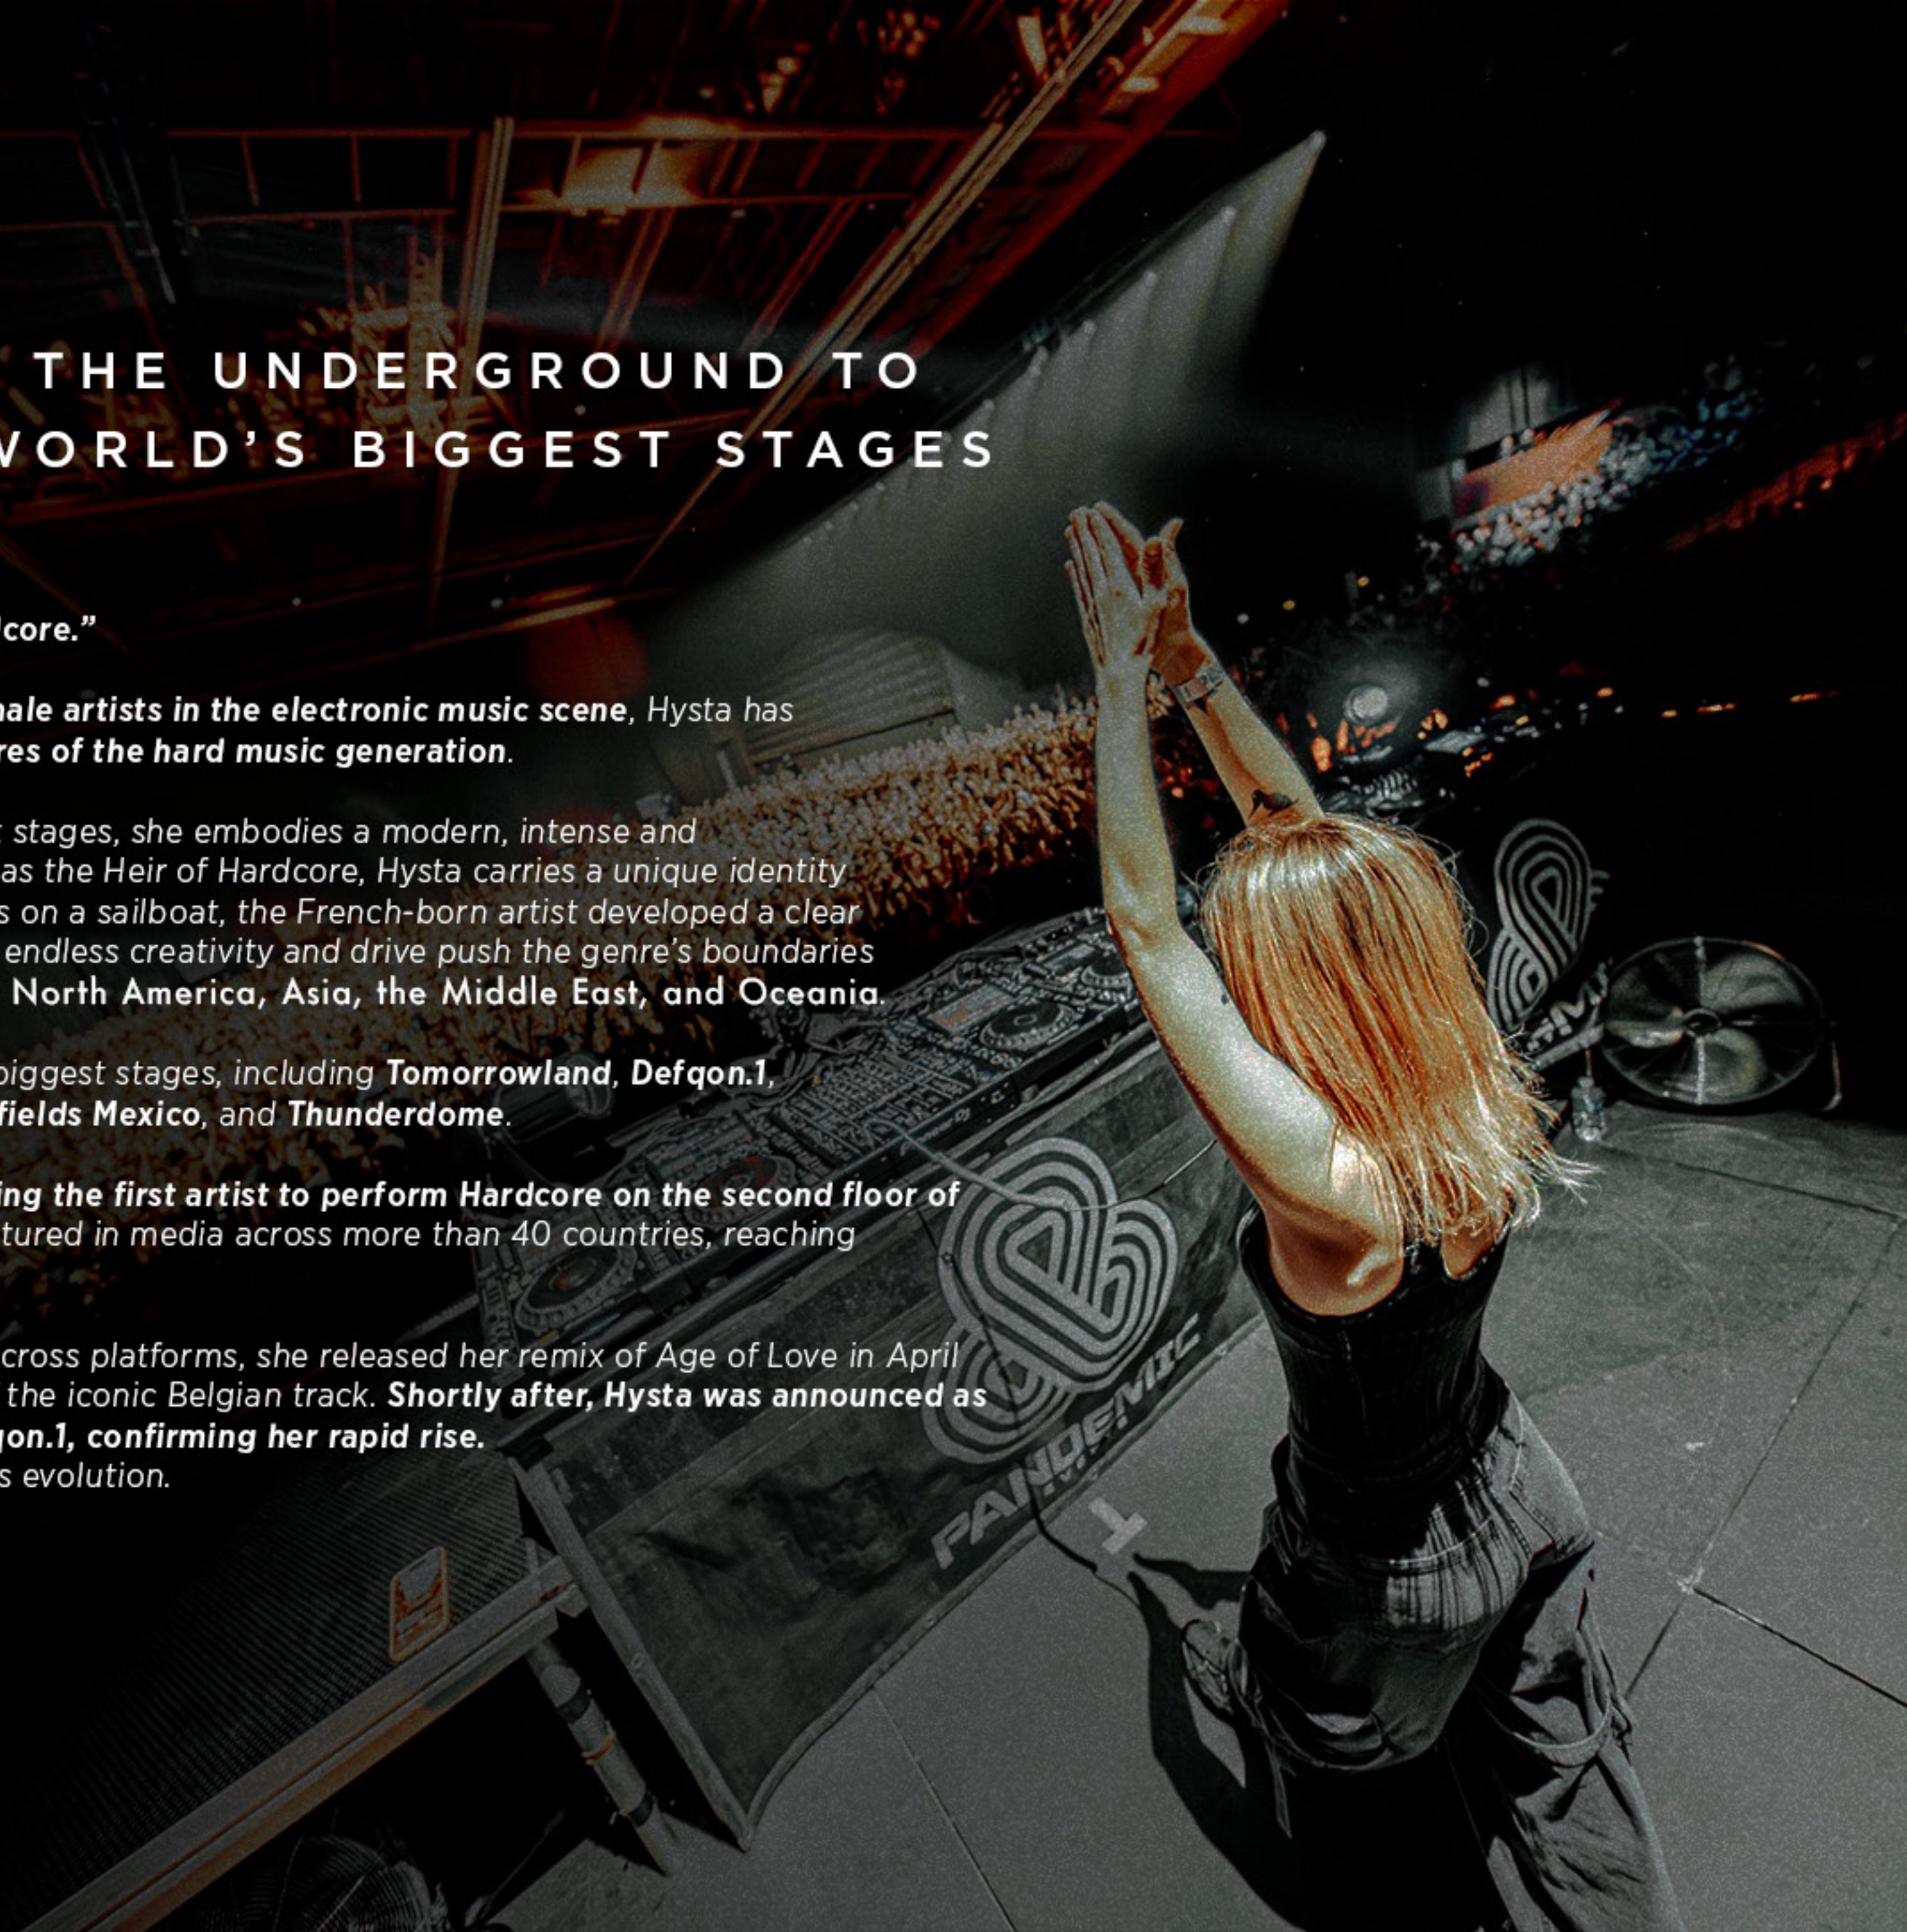

From the underground to the world's biggest stages, she embodies a modern, intense and uncompromising vision of the genre. Known as the Heir of Hardcore, Hysta carries a unique identity shaped by her past. Raised across continents on a sailboat, the French-born artist developed a clear ambition: to make Hardcore worldwide. Her endless creativity and drive push the genre's boundaries from every corners of Europe to South & North America, Asia, the Middle East, and Oceania.

In just a few years, she has taken over the biggest stages, including **Tomorrowland, Defqon.1, Boomtown Fair, Dour, Nature One, Dreamfields Mexico, and Thunderdome**.

In late 2025, she made history by becoming the first artist to perform Hardcore on the second floor of the Eiffel Tower. The video went viral, featured in media across more than 40 countries, reaching millions of views worldwide.

After accumulating millions of streams across platforms, she released her remix of Age of Love in April 2026, the first official Hardcore remix of the iconic Belgian track. **Shortly after, Hysta was announced as a headliner and Spotlight artist at Defqon.1, confirming her rapid rise.** Hysta doesn't follow Hardcore. She is its evolution.

Hysta is here to stay.
